Did you try the following IPs? In the list below we listed all known router IPs for the manufacturer TRENDnet. Maybe this will work for you. # Default Router IP 1192.168.10.12192.168.0.13192.168.1004192.168.1.15192.168.10.306192.168.0.207192.168.10.1108192.168.1.1009192.168.1.25010192.168.16.111192.168.2.112192.168.223.10013192.168.0.3014192.168.0.22815192.168.1.25416200.200.51710.0.0.318192.168.1.20019192.168.0.10020192.168.10.1021192.168.1.302210.0.0.223192.168.1.83 Manuals for TRENDnet TEW-731BR Manual Quick Install Guide Datasheet Nothing of the methods worked for me and I still not get access to my TRENDnet ! All you need to do is to reset your modem. This can be done easily by clicking on the reset button at the back or at the bottom of your router. If you hold down this small button for approximately 20 seconds, (you may have to use a toothpick), then your modem will get restored to the factory settings. What you need to keep in mind is that when you reset your modem, you will lose your connection online. It is therefore better to take an expert's assistance in this regard. Note: If you have not enough information, it is obviously recommended that you should get help from a person who has all the knowledge about this topic. Here you can find the default IP address and the username and password for the user interface of the TRENDnet TEW-731BR N300 Wireless router. This site also contains information about the preconfigured Wi-fi settings of the device. In the bottom part of this website, you will find a manual for accessing the user interface of this router and resetting its factory settings. Accessing the user interface is necessary when you want to change the router configuration. For the TRENDnet TEW-731BR, you have to do the following steps for access: Switch on router Establish a connection between the device and the router via network cable or Wi-Fi* Start web browser Insert IP address in the address bar and confirm with 'Enter' button Enter username as well as password in the login form and confirm * Make sure that your router's Wi-Fi is activated. Resetting default settings is especially helpful when you have changed and forgotten the login data for the user interface. Please consider that not only will settings like IP address, username and password be set to factory settings, but all configurations you may have made will as well. Execute hardware reset To reset the TRENDnet TEW-731BR to its default settings, you have to do the following steps: Put router into operation Press RESET button for at least 15 seconds Device restarts automatically Router has been reset to factory settings Execute software reset With the TRENDnet TEW-731BR, you can restore the factory settings with the installed software. Log in to the user interface of the router with your access data and execute the steps that are described in the user handbook. After you have successfully executed the steps mentioned above, the configuration of the router will be reset to factory settings. If you want to log in to the user interface, you have to use the preset login data.   The perfect spot does it all; be it romance or your router! To avail the best signal and network connectivity, make sure you keep your TRENDnet TEW-731BR router visibly and not facing the wall or behind the curtains Auto channels might fail you once in a while; believe that you're smarter than the TRENDnet router! Find a seamless wireless channel instead of what the router finds automatically. This would ensure that your signal does not interfere with that of your neighbors. If you're running a Windows-based PC, you can see what channels neighboring Wi-Fi networks are using Press Start > type "cmd". Open Command prompt In command prompt type netsh wlan show all You will see a list of all wireless networks and the channels being used in your vicinity. instead of using "Auto" for the control channel, Pick the channel that has the lowest interference Check If TRENDnet TEW-731BR has dual-band, the more commonly used band would be 2.4GHz; however, switching to 5GHz would bring out better results! It depends on your device though; if you're running an old lad, you might have to switch back to the conventional Gaming consoles/media streamers work better when connected through Ethernet cable of TRENDnet TEW-731BR; in fact, as you might not be moving your TV all over the house, why connect it to the Wi-Fi at all? The gaming consoles / video streaming devices flood the network with data. This means that if possible, you should consider hardwire (using Ethernet cable) the devices that tend to consume a lot of bandwidth. Although this can sort of defeat the purpose of having wireless network, but it can actually help your overall network speed of TRENDnet TEW-731BR if you can hardwire the bandwidth hogs Here is something important to note! On schedule, folks, reboot your TRENDnet TEW-731BR router! Though routers are built to constantly be running at all times, simple tweak like regular power cycling (a fancy way of saying unplugging the power cord and shoving it back up) helps with most issues. Rebooting your TRENDnet TEW-731BR can fix Internet connection problems, improve slow moving connections and resolve wireless issues altogether. Try unplugging your TRENDnet modem on a quarterly basis to stay proactive (Never reset, always reboot modem) Default logins for TRENDnet 61 % IP Address: 192.168.1.1 Username: admin Password: admin 19 % IP Address: 192.168.2.1 Username: - Password: admin 13 % IP Address: 192.168.10.1 Username: 'randomly generated' Password: admin 3 % IP Address: 192.168.0.1 Username: admin Password: password 3 % IP Address: 192.168.1.1 Username: admin Password: - TRENDnet TEW-731BR Router Login To Login as Admin at TRENDnet TEW-731BR Router use the guide below. Connect your PC or Laptop via cable to your router. Or instead use your wireless network. Suggestion - It is recommended for the connection to be done by using a cable attached to the TRENDnet TEW-731BR router. That will prevent you from losing connection in the middle of the configuration / setup process. By using a web browser of your choice and entering the IP address of your TEW-731BR router in the address bar you will load the login screen. You can find the ip address on the back of your router. Now enter the default username and password of your router and you will be granted access to its admin panel. If you do not happen to know what the username and password is then feel free to lookup some of the default ones for TEW-731BR routers by TRENDnet. TRENDnet TEW-731BR Routers Support If you experience problems logging in a TEW-731BR router, then you are probably using the wrong username or password. Do not forget to store the login details after you have reset them. Forgot Login Password? Try the hard reset function. In order to do this, press and hold the small black button usually situated at the back your router case for approximately 10 seconds. Doing so will reset your router to the factory settings. Router login page not loading? If for some reason the admin webpage fails to load, then check if the device you are using is connected to the wi-fi. You can also lookup what exact IP address has been set as default for the router. In many cases problems related to loading the login screen of the router are related to it having a different IP from the one tried to be loaded. In this case, your network is most certainly using a different IP address. If that is the case, review our IP address router list, and find the right address. If you need any help, check out our tutorial on how to find your router's IP address.
